

313 Home Industries and Famous Products The forested northern mountains give rise
 314 and firewood gathering. Kunigami-son and Kushi-son emphasize the gathering of
 433 bamboo and firewood. On the other hand the making of charcoal is more important
 [367] in Nago, Hareji, and Ōgimi. The urbanization of the south combined with
 [391] the postwar extension of roads into formerly inaccessible parts of the north
 have accelerated exploitation of the northern forest resource. Particularly
 heavy is the demand for long roof poles, or kichigwā, after every major typhoon.
 [237] Kunigami-son and Higashi supply the bulk of these. Where wood is plentiful
 behind a coastal road, one often finds lime kilns, which process the coral of
 the reefs.

• 258 The sea is also a major source of material for home industries. Sea
 433 salt is made at Yagaji, Urasoe and Oroku on the west coast, at Senza and Awase
 on the east. Kunigami-son prides itself upon its production of seaweed. But-
 [237] tons from seashells are made in Mawashi. Fish cakes ('kamaboko') are made in
 quantity in Itoman and Naha, with lesser amounts being produced in Ishikawa and
 Nago. Dried bonito ('katsuboshi') is a specialty of Tonaki Isle to the west.
 Motobu-chō holds second place, followed by the western isles of Tokashiki and
 505 Zamami. For over a hundred years the small cargo sailboats ('Yambaru-sen')
 178 of the east coast have carried forest products from the north. The extension
 of roads into the northern forests has greatly reduced the amount now carried
 by sea.

433 Horse breeding is a specialty in Nakazato (the eastern half of Kume-
 [232] shima), which has 22% of the gunto's production of horses. However, the pro-
 [242] duction of horse and cattle hides is concentrated in the urban areas, which
 [251] account for 84% of the hides produced. Nakazato is also famous for production
 of silk cocoons, being responsible for about two-fifths (38.7%) of the gunto's
 total. The leading mainland producer is Motobu-chō, with 9%.

Although Okinawa is not self-sufficient in tea, the three areas of
 [245] Gushikawa, Ishikawa and Kunigami produce over half of the local tea. In Oku
 [474] village of Kunigami, the tea factory is a cooperative venture. Gushikawa
 [374] and Chatan pride themselves upon possessing 'sake' and 'awamori' distilleries.
 [254] Mawashi is the center of production of farm tools, and accounts for some
 weaving of banana cloth. Weaving of mats from the "seven isles reed"
 ('shichitō-i') is a local specialty of Kanegusuku.

[314] Travertine quarries are found in Motobu-chō and Katsuren. A sandy
 limestone is quarried at Minatogawa in Gushichan.
